

This map of Georgia displays all 159 counties, each labeled with its name. The counties are color-coded based on the percentage of the Black population in 2010. The color scheme is sequential, ranging from dark purple (0-10%) to white (30-40%). The map shows a clear geographic trend where counties with higher percentages of Black residents are concentrated in the central and southern parts of the state, while counties with lower percentages are more prevalent in the northern and western regions.
