2015 Summary Report
Uniform Crime Reporting (UCR) Program
Georgia Crime Information Center

Georgia's Uniform Crime Reporting (UCR) Program is derived from the Federal Bureau of Investigation's national program. Utilizing standard definitions and procedures established by the national program, crime data on the number of serious criminal offenses reported to or investigated by law enforcement and the number of arrests for all crimes are collected from law enforcement agencies. This data can then be used to portray crime in Georgia as well as used for comparisons throughout the State and United States.

UCR data presented in this annual report is compiled directly from summary offense and arrest reports submitted from Georgia's law enforcement agencies. Data presented does not include estimates for incidents or arrests that might have occurred but are not reported.

The 2015 report reflects statistics based on local agency submissions from 2011–2015.

The UCR data presented in this report, as well as additional data compiled for the UCR program, can be retrieved for special purpose reports upon request. You may contact the UCR program via fax at (404) 270-8463 or email your request to:
ucrweb@gbi.ga.gov.

TABLE OF CONTENTS

CRIME DATA

Data collected on offenses reported to or investigated by law enforcement include counts for the crimes of murder and non-negligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, and motor-vehicle theft. Because of their seriousness, frequency of occurrence and likelihood of being reported, these crimes are regarded as an Index Crime. The first four Index Crimes are violent crimes or crimes against persons. The remaining Index Crimes are serious property crimes.

The following table is a profile of reported index Crimes for 2015 in Georgia. This table includes calculated crime rates per 100,000 people. The use of crime rates in making comparisons in crime trends helps to minimize problems with crime data interpretation. However, readers are cautioned that crime rates cited are reliable indications of crime only to the extent that population estimates are accurate, that victims report crimes and that Uniform Crime Reports are submitted to GCIC by law enforcement agencies.

REPORTED METROPOLITAN STATISTICAL AREA (MSA) INDEX CRIMES - 2015

The table below reflects Index Crimes reported for each designated Metropolitan Statistical Area (MSA) in Georgia. Listed for each area are the counties encompassed in that MSA, corresponding county populations and the total Index Crimes reported. The number of crimes reported for the county is compiled from all law enforcement agencies operating in that county. This includes sheriff's offices, police departments, campus police, and any other agency designated as a law enforcement agency.

JUVENILE ARREST DATA

The following tables represent juvenile arrest data. For the purposes of the FBI UCR program, offenders who are 18 years of age and older are considered adults while anyone under the age of 18 is considered a juvenile. The first table is a comparison of juvenile arrests made between 2011 and 2015 for all crimes *(Part I or Index and Part II or non-serious crimes)*. As part of the juvenile arrest report, local agencies also are requested to indicate how the juvenile arrestee was handled. Possible dispositions include referrals to other courts or agencies or disposition by the local law enforcement agency.
JUVENILE ARREST DISPOSITIONS - 2011-2015 are presented in the second table.

CRIME AND ARREST COMPARISONS
2011-2015

The first table shows the number of incidents and arrests reported each year, based upon UCR criteria, between 2011 and 2015 for each of the seven Index Crimes. While comparisons of arrests to crimes reported could be useful measurements of law enforcement activity, caution must be exercised. Arrests reported in one year may be incidents that occurred in that same year or earlier. Since more than one individual can be arrested for a crime, or individuals can be arrested more than once during a given year, arrest statistics more accurately reflect the number of arrests made, rather than the number of crimes solved or the number of different persons taken into custody. Also, it is possible in the UCR program to "clear" an incident without making an arrest, if certain exceptions are met

The second table shows a profile of arrests made by age group for each of the seven Index Crimes between 2011 and 2015

Family Violence

The collection of family violence data began in the last half of 1995 when passage of legislation mandated reporting of such incidents to the GCIC by local law enforcement agencies. Since that time, the number of reporting offenses has increased steadily. In 2015, there were 65,487 reported incidents of family violence. Children were involved in almost 31 % (20,578) of the total incidents. In an additional 20 % (13,195) of the incidents, the act was committed in the presence of children.
