INVESTIGATIVE DIVISION

	December 2013	Fiscal YTD
Total Sworn Employees		235 (filled-includes grant)
Total Investigative Hours Expended	23,541.00	155,882.75
Crimes Against Persons, includes	7,403.00	49,609.50
Death Investigations	3,817.50	25,044.50
Child Abuse	1,781.50	12,282.50
Sex Crimes	233.50	2,271.25
Missing Persons	62.00	469.00
Assault, Kidnapping, Robbery, Terrorist Acts, Fugitive, Human Trafficking, etc.	1,508.50	9,542.25
Property Crimes, including Theft, Burglary, Forgery	1,893.25	14,479.00
Drug Investigations	4,751.00	33,729.00
Meth Lab Investigations	23.00	264.00
Polygraph Examinations	1,069.00	6,352.00
Background Investigations	887.00	2,066.00
Other Investigations, including Preliminary Investigations	3,603.75	24,356.75
Bomb Disposal Services	677.00	5,136.00
Crime Analysis	12.00	358.50
Crime Scene Specialists	3,222.00	19,532.00
	All figures above represent Investigative Hours	
Total Seizures	\$437,267.00	\$2,955,083.30

Investigative Hours Expended YTD FY2014

Meth Lab Waste Disposal Grant

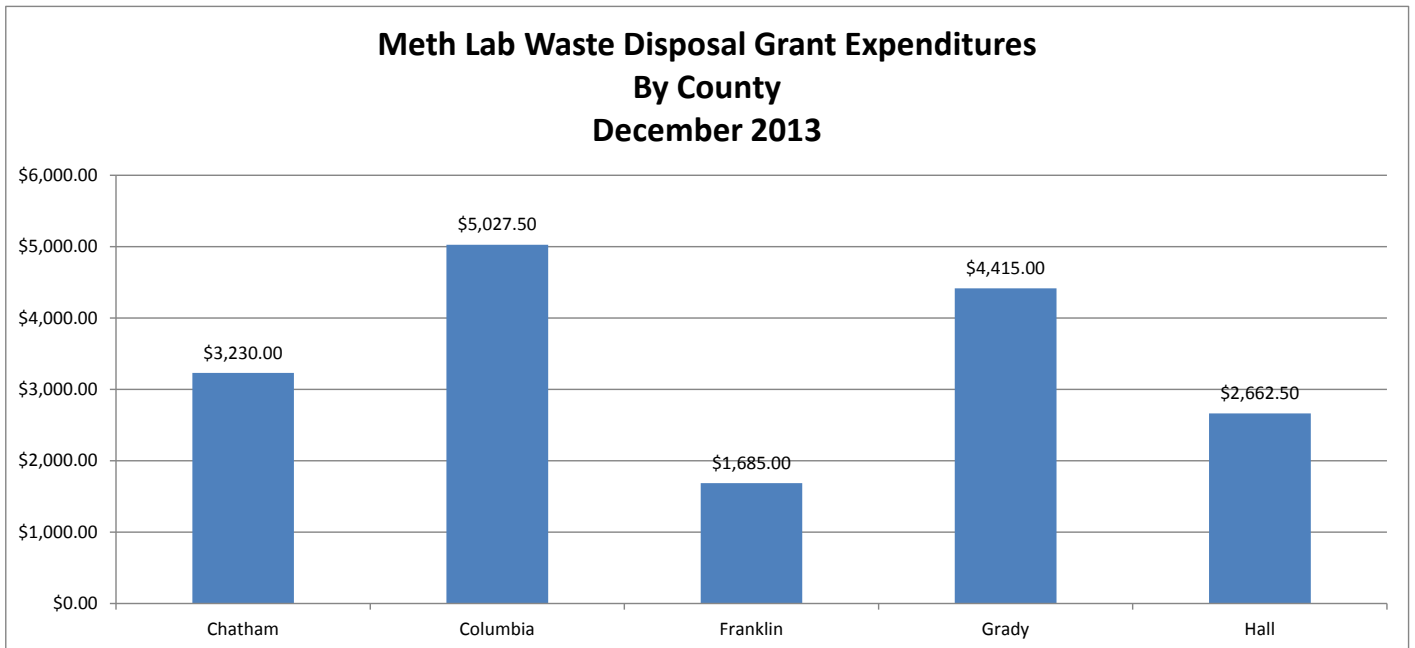

Total amount expended February 2012 through September 2013: \$947,951.50

New grant award for 2013-2014: \$693,211.00

Total amount expended over the life of the grant: \$1,004,066.50

Total Expended in December 2013: \$17,020.00

Total remaining: \$637,096.00

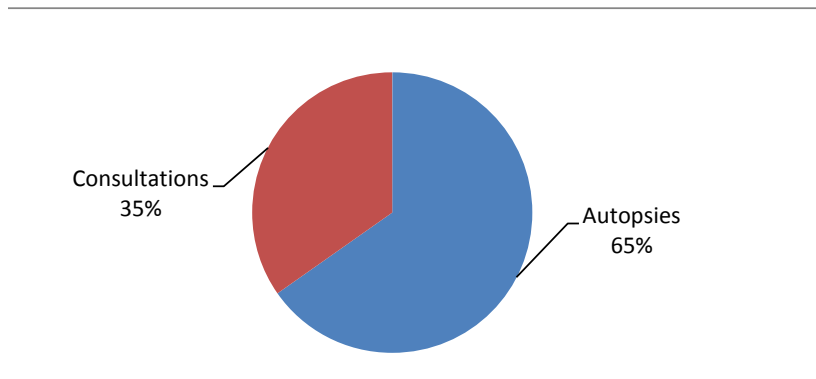

Crime Lab

Medical Examiners (includes all laboratories)

	December 2013	FY2014 YTD
Autopsies	244	1,521
Consultations	158	810

Compliance and Customer Support

1. Customer Training

GCIC personnel provided **304.50** hours of training to **517** criminal justice agency employees during the month. The total number hours of training conducted during **FY2014: 1,543.75**

2. Compliance Audits

GCIC conducted (3) full service audits; (6) on-site audits conducted for agencies with “inquiry only” access from the CJIS network; (9) criminal justice E-Audits; and (19) fingerprint/disposition audits for the month. The total number of audits conducted during FY2014: 320.

Projects

AFIS REPLACEMENT

Project Description – GCIC replaced the Georgia Bureau of Investigation’s 22 year old Automated Fingerprint Identification System (AFIS). The AFIS replacement enhanced fingerprint identification services to permit identification of criminals more rapidly through the use of state of the art alternative search methods and information sharing. Phase II of the project focuses on the Image Archive system expansion. The expansion allows divisions within GBI to store documents and easily retrieve when needed.

The project is in Phase III which focuses on the FBI’s Next Generation Identification (NGI) Increment 3 implementation which introduces two new features: palm submission capability and the use of the EFS (Extended Feature Set) profiles for latent searches of AFIS systems.

Phase III includes the NEC Integrated Fingerprint Workstation (IFW) and Interoperability Interface applications that support the exchange of information related to the FBI NGI Increment 3 transaction types.

Listed below are the functional areas of NGI Increment 3 transaction type support:

1. FBI interoperability support for systems other than an NEC AFIS [i.e. Universal Latent Workstation (ULW) or other dissimilar AFIS] to send transactions through the GBI connection to and from the FBI.
2. Initiating and receiving supported transactions from the NEC workstation directly to the FBI.
3. Interoperability to the GBI AFIS from external systems.

Accomplishments This Reporting Period

Image Archive Expansion:

- 60% of microfilm records have been uploaded to the NEC Image Archive system.

NGI Increment 3:

- Forest Park PD has successfully tested as the pilot site for the dissimilar AFIS interoperability interface with a Spex Forensic system. Walker County Sheriff is preparing to test submitting ULW transactions to GBI.

SEX OFFENDER REGISTRY REDESIGN

Project Description – In October 2012 GBI implemented a new sex offender management application, Sex Offender Registry Tool (SORT). SORT is a more modernized system that uses the latest web technologies to provide local law enforcement access to centralized up-to-date information of sex offenders in their jurisdictions. Local agency staff has direct access to offender data with limited administrative authority to manage users.

The remaining phases of the project include the implementation of the SORT Public Website and the establishment of a web service between the SORT and Department of Corrections' SCRIBE system for data transfer. Additional phases include the integration of SORT with the NEC Image Archive (AFIS/IA) and customized photo and reporting enhancements.

Monthly Update – Application Development and Sex Offender personnel continue to monitor SORT transactions.

Accomplishments This Reporting Period

- Completed batch geocode for SORT Admin Prod
- Created the ability to search offenders by aliases
- Corrected the display of primary residence for incarcerated offenders
- Corrected the “Offense Description” to show definition of the offense
- Changed absconded offenders’ last known address to “unknown” and removed from geocode map
- Disable the County dropdown box when the Incarcerated button is selected
- SORT Public Website URL link sent to GCIC ADDs for review

SERVER CONSOLIDATION

Project Description – The Georgia Technology Authority (GTA) will be consolidating production, test and developmental servers to the NADC. Consolidation and virtualization will enable the State to reduce the number of servers being supported.

Monthly Update – Last Business Council meeting held December 18, 2013; next meeting scheduled for January 15, 2014.

Accomplishments This Reporting Period

- On-going progress by Agency on applications installation/remediation.
- On-going progress to close critical issues for application installs/remediation.
- Micro Focus Cobol installation completed and turned over to Agency to resume application remediation.

ADVANCED AUTHENTICATION

Project Description – GBI is working with RSA to implement a solution that will meet requirements outlined in the FBI CJIS Security Policy 5.0 for advanced authentication. The RSA product will integrate seamlessly with the State of Georgia’s existing SSL VPN and will offer a comprehensive multi-factor layered protection for all users.

Monthly Update – The GBI continues to make progress in the implementation of the Advanced Authentication services to integrate with the SSL VPN product.

Accomplishments This Reporting Period

- AT&T and their third party vendor (Megapath) reviewed the iFrame sign-on web page script that was added to the Juniper based SSL VPN for configuration. After modifications

to the script and changes to the Radius server, the results were a success. The AA configuration process is progressing with verifying user credentials.

- The GBI discovered that some of the test users were receiving an error message if the user was not placed in the correct group. The GBI will solicit users outside the agency with SSL1 credentials to log-in to the AA application for testing purposes.

SORNA REALLOCATION GRANT

Project Description – GBI received a Sex Offender Registration and Notification Act (SORNA) grant award from the Criminal Justice Coordinating Council (CJCC) to assist the State in moving towards compliance with the SORNA portion of the Adam Walsh Act. One of the line items within this grant is the purchase of live scan devices to be used by the Georgia Department of Corrections (GDC) to capture fingerprints and palm prints to verify the identity of individuals entering the State Prison system. Another item included in this grant is the configuration of CCH to accept information from the GBI Automated Fingerprint Identification System (AFIS).

Monthly Update – The GBI did not receive any feedback from DOC concerning the progress with the RFP. The DOC will have a more accurate status update the first week in January.

Accomplishments This Reporting Period

- NEC modified AFIS to capture and retain sex offender finger prints and palm prints. The system sends notification to the sex offender registry once the prints are available. (Task Completed: September 2013)
- Unisys provided task order details for the completion of the work for the LIMS/CCH DNA implementation.

FILE SERVICES TRANSFORMATION/CONSOLIDATION

Project Description – Move identified GBI File Server data from existing legacy hardware to new operationally stable and supportable hardware.

Monthly Update – Out of twenty-six possible sites, twenty-three site surveys have been completed.

Accomplishments This Reporting Period

- Gathered server and site information.
- Scheduled weekly checkpoint meetings.
- Twenty-three site surveys completed by vendor OnePath.
- Scheduled presentations with Presidio for GBI project team to review backup vendor options, solutions, possibilities and feasibility.
